

BrightEye NXT 450

Clean Streaming Router Applications

Mobile Truck Application

Great for mobile applications, the BrightEye NXT 450 Clean Streaming Router provides signal reception, decoding, clean switching and distribution to multiple destinations using any combination of formats. Seamlessly switch between 1080i, 1080p, 720p, and DVB-ASI sources. Simply set one of the clean switch outputs to your desired format and all of your sources will be automatically converted. Multiple outputs deliver streaming by IP back to the studio, DVB-ASI to your satellite uplink, and HD SDI for local monitoring. Remotely cut and mix sources or use Salvo and Action shortcuts from your tablet or any web-enabled device. The 5835 Router and Action Control Panel is fully customizable to put exactly the right controls in front of busy operators.

Crosspoints

Routing Control with user legible buttons for Sources and Destinations. Full travel push buttons with sculpted caps.

5835 – Router and Action Control Panel

LCD Display

Thumbnail preview of Sources before Take or Mix transition. Displays input status, signal timing, and metadata.

Action Keys

Action Keys are fully programmable. Recall any set of parameters, customize to suit exact application.
